# Case study - Cloud consulting and infra support

## Migration - Product Company, UK

### Problem statement

Customer has 100+ QA and Pre-prod servers in VMWare and Openstack, wanted to migrate to AWS.

### Solution

- Completed the project in hybrid delivery model with onshore and offshore team.

- Offshore team worked with onshore to understand the existing infra and delivered blueprint of migration strategy

- Offshore team migrated QA servers to AWS and onshore team migrated pre-prod server using the tool stack as approved.

- The project is completed in 4 months.

### Technologies used

AWS, CloudSDK / CLI, VMWare, CloudEndure
